

Ho Chi Minh City, 19th November, 2020

Vision, Mission, Educational Philosophy and Core Values of Faculty of Fisheries

1. Vision

By 2030, the Faculty of Fisheries – Nong Lam University, Ho Chi Minh City will become a prestigious education and research institution in the country and in the Southeast Asia region.

2. Mission

The mission of Faculty of Fisheries is to train qualified human resources, to conduct research and to transfer technology to solve problems in production toward sustainable development of the fisheries sector.

3. Educational philosophy

Liberation – Responsibility – Innovation

Liberal Education: The Spirit of Liberal Education at Faculty of Fisheries is an educational philosophy aimed at creating people with a sense of innovation, responsibility and independent liberal thinking that accept diversity and differences.

Responsibility: FoF's students are given and accept a high level of responsibility to self, to others and to the community. We act with responsibility when we do our job well and help others do the same. We take responsibility for our mistakes that we can learn from them and even translate them into success.

Innovation: We continuously introduce creative change with the purpose of constantly improving and being responsive to the times.

4. Core values:

Humanism – Innovation - Integration

Dean of Faculty of Fisheries

Assoc. Prof. Dr. Nguyen Nhu Tri
